

```
#if 1: print 'This should be comment!!'  
# else: print 'But only this one really is!!'  
  
# Seems to be a problem with PyFontify, needing a  
# whitespace after a hash? py2html using PyFontify  
# shows the same behaviour. Haven't tested yet with  
# mxTextTools...  
  
# Just has fixed the bug in PyFontify.py 0.3.3...
```
